

ReadyWood™

Pre-Primed TRIM

Works Well With My Moldings

ReadyWood™ trim boards are the perfect complement to match with moldings. The fit-and-finish will be snug and seamless.

ReadyWood™

Pre-Primed **TRIM**

Readywood is a new trim board manufactured from domestic eastern white pine. Eastern white pine is a wood of choice for fine craftsmanship. ReadyWood trim has all the properties you care about to make your work efficient and your end results beautiful.

Double Coated

ReadyWood trim boards are double-coated.

First, a wood conditioner is applied to assure a smooth surface and an effective bond.

The second step is a primer/sealer coat.

Your ReadyWood trim board is ready to paint.

Safe To Use

ReadyWood pre-primed trim is safe to use. There are no added chemicals and it is formaldehyde free. The coating formula is low VOC for good indoor air quality.

Easy To Work With

This North American wood is remarkably stable. It is easy to work with a fine and even grain. It has uniform texture and holds paint well.

Available:

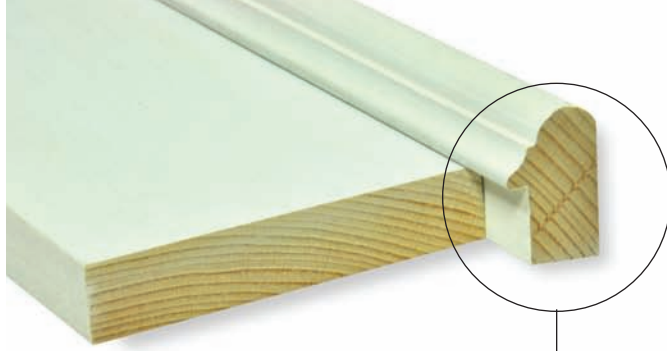

1 x 4

1 x 6

1 x 8

Fits Snug With Moldings
