PRINCETON
FOREST PRODUCTS

Naturally beautiful. Naturally durable.

UNIQUENESS

- > Exclusive wood species for projects with unique character
- > A uniform, warm yellow that, without any finish, gradually changes into a silver-grey hue
- > Extra-fine grain that provides a smooth, luxurious touch without splinters
- > Free from pitch and resin; no extractive bleeding unlike other wood products

DURABILITY

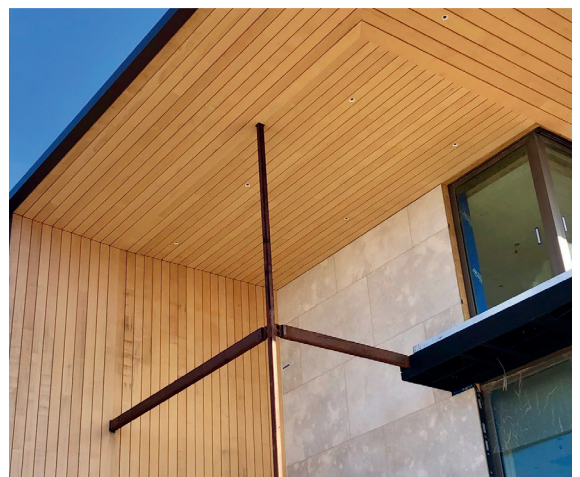

- > The hardest in the softwood family
- > 66% harder than traditional Western Red Cedar
- > Exceptional working properties; can be worked by hand or easily machined
- > Holds well to paint, stains, glue, and other types of finishes
- > Naturally decay resistant and impervious to most insect attacks
- > Natural extractives that make it decay resistant are aromatic when cut

SAFETY

- > Wood without the worry: safe to be used indoors and outdoors at home
- > Zero added chemicals, preservatives, pesticides, or active ingredients
- > Splinter resistant

LOCALLY MADE

- > 100% made in North America
- > Mature and stable: no offshore juvenile wood

PRIMECEDAR

Add a distinctive touch to your projects.

Princeton Forest Products' PRIMECEDAR high-quality finishing and decking solutions are the superior choices for any of your outdoor projects. Using Alaskan Yellow Cedar offers unmatched durability and smoothness, making this species the natural choice for any contractor who values an exceptional product that will hold its beauty over time.

Renowned for its appearance and long-lasting performance, this North American wood provides a luxurious look at an outstanding value in comparison to many other exotic alternatives. Experienced architects use our PRIMECEDAR for distinctive projects that make them truly stand out.
